

## **THE WILL**

**Listen ... glory's not your right  
Real genius needs no spotlight  
In times of struggle and great duress  
Remember to make more of less**

**Who knows where, who knows when-- destiny's in the air  
Can't say for sure what good may come  
But when it does better get you some**

**(chorus)**

**Don't think about fame, day and night  
Be the hero of your life  
So when the verdict's read and time brings the bill  
Make history say you had the will**

**Chance ... selects a graceless few  
Be brave to protect the best of you  
The love inside will take you so far  
If you know who you really are**

**You know where, you know when--fate's heavy in the air  
Better expect that good will come  
'Cause when it does, you are far from done**

**(chorus)**

**There's more to life than you can conceive  
Wealth is something only a soul can decree  
Take what you need, and need love to give  
Then return to the path you were born to live**

**Don't think about fame, day and night  
You're the hero of your life  
So when the verdict's read and time brings the bill  
Make history say you had the will  
And friends that stay will share the thrill  
Don't give up now, it's fear that kills  
Yes, you have ... the will**
